

```

package com.ibm.Test;

import java.util.List;

public class DataTable {

    public static void main(String[] args) {

        System.setProperty("webdriver.chrome.driver",
"./driver/chromedriver.exe");
        WebDriver driver = new ChromeDriver(); // we are initialising the
driver
        driver.get.window.maximize();
        driver.get("https://datatables.net/"); // this will start the browser

        driver.findElementBy.xpath("//select[@name='example_length']/option[3]").click
();// this will click on 50 pages and click

        List <WebElements> names =
driver.findElements(By.xpath("//table[@id='example']/tbody/tr/td")).click();// this
will click on the name

    }

}

```
