

```

package com.ibm.Test;

import java.util.List;

public class MoneyControl {

    public static void main(String[] args) {

        System.setProperty("webdriver.chrome.driver",
"./driver/chromedriver.exe");
        WebDriver driver = new ChromeDriver(); // we are initialising the
driver
        driver.get.window.maximize();
        driver.get("https://www.moneycontrol.com/"); // this will start the
browser

        driver.findElementBy.xpath("//a[text()='Stocks']").click();// this will
click on the stock link

        List <WebElement> allLinks = driver.findElements(By.tagName("a"));

        System.out.println("All links found on web page are: " + allLinks.size()
+ " links");// this will print all the links
        System.out.println(link.getAttribute("href"));
        System.out.println(link.getText());// this will print all the link text

    }

}

```
